

**September 2007,**

Plano, TX - GENBAND™ Inc., a market-leading developer of next-generation IP gateways and application solutions, today announced that its M6 Communication Applications Server has been deployed with UK wholesale service provider Vibe Communications.

The M6 platform is an integrated, scaleable, standards-based solution that delivers the greatest number of revenue-generating voice and multimedia applications out of the box, eases administration and works with the widest range of both network equipment and protocols to reliably support a virtually unlimited number of users for enterprise, consumer, and mobile users. GENBAND's M6 solutions allow rapid and cost-effective expansion into new geographic markets and increase service provider ROI by leveraging new or existing broadband infrastructure to deliver advanced voice services as well as grow revenues from existing customers with enhanced multimedia applications.

Vibe Communications is a unique operator in the UK providing a 'total communication package' for business customers with a wholesale service focus. The M6 platform is a key component to Vibe's service offering with the latest VoIP, fixed, mobile, Internet, and Desktop Service Intelligence in a true best-of-breed, managed network environment. Vibe simplifies the customer experience by combining all these services into one bill. Using the M6 platform to power their non-geographically restricted VoIP network, Vibe is focused on mobile, WiFi, dual mode handsets, and WiFi/GSM handoff for small-to-medium business and enterprise customers.

"We reviewed many platform options to deliver differentiated VoIP and multimedia services for over a year and half period," said Darren Cubit, managing director for Vibe Communications. "We chose the GENBAND M6 platform because of its quality of service and broad feature offerings that provide us with many options to focus and push this technology into the converging markets."

"GENBAND is very pleased to add this rapidly growing customer," said Ron Halpern, executive vice president of international sales at GENBAND. "Vibe is a prime example of how an innovative company can create new markets and customer value with the M6 Communication Applications Server"

### **About Vibe Communications**
